

VNIT Library - Business Insights Report

Usage Insights

- Borrowing peaks during exam preparation windows; category demand led by Engineering & Technology.
- Computer Science and Mechanical drive the highest issue counts.

Overdue & Fines

- Overdue rates vary by department; targeted reminders can reduce delays.
- Fine distribution clusters at low values, indicating short overdue periods.

Books & Authors

- Top titles include 'Engineering Mechanics' and 'Data Structures in C++'.
- Author popularity maps to core curriculum and trending fiction.

Engagement

- Student ratings remain consistently positive (avg ~4/5).
- Online issue mode shows higher satisfaction than manual.

Recommendations

- Expand copies of high-demand titles; rotate older stock.
- Nudge-based return reminders 2 days before due date.
- Department-wise awareness drives for fine policy and return timelines.
